

2010 prius lithium battery

The Toyota Prius" battery is a key component of its hybrid system. It consists of 28 Panasonic nickel-metal hydride modules, each containing six 1.2-volt cells. Connected in a series, these modules produce a total of 201.6 volts. A full hybrid charges from this battery pack, which draws power from the gasoline engine and the brakes. Plug-in hybrids can be charged externally as well.
