The Park position sensor also isn't working, neither is the radio, the HVAC controls, the rear hatch, or the right rear turn indicator. The parking brake will engage and disengage, but only just after the battery has ...

This light indicates a random malfunction with the vehicle system. My first recommendation would be to connect a diagnostic scan tool to the vehicle in order to retrieve any malfunction entries ...

Hello everyone, I bought a 2018 Tiguan a month ago, and wonder whether it has a start/stop ACTIVATION problem on it: 1, sometimes when I park the car without manually turn off the engineer power button, the start/stop system can turn off the engine, which is reasonable because the car is not moving.

Introduction Volkswagen did not show up late to the SUV party. It skipped the bash entirely. Ford launched the original Explorer for the 1991 model year, and VW did not counter with a reasonably priced family-size SUV until recently, when it rolled out the 2018 Atlas. Like a push-started 1963 Beetle, though, Volkswagen is slowly picking up speed. Honda debuted the original CR-V for ...

Conditions that require a manual engine start You must restart the engine manually if: The driver door is opened. The engine hood is opened. Manually activating and deactivating the Start-stop system Press the m/k/n544MK button => Fig. 121 to deactivate the system. If Start-stop has been deactivated, the indicator
