I'm happy to say that after testing it, the Arlo Solar Panel took on enough sun, even on this shady side of the house, to keep the camera topped off. In fact, there's enough residual light in the area that it is actually still providing some power to the camera even though it is in the shade, which I was really impressed to see.

I have already ordered one Arlo solar panel to install with one of my cameras which is a little too high up for me to comfortably get up on a ladder and lift it down to recharge. I won't install solar panels with the other two that I had hooked up to the panels that stopped working, as I can comfortably reach them to lift them down for recharging.
