

Back up house generator

A whole-house generator, or standby generator, functions by providing automatic backup power to an entire home during power outages. It's integrated into your home's electrical system and usually runs on natural gas or propane. When the generator detects a power disruption, it activates automatically.

The standby generators with the most power output are called whole-house generators because they could theoretically power your entire home if sized properly. Value - A standby generator is an investment that pays for itself every time the power goes out while simultaneously increasing the resale value of your home.

When the power goes out, a backup generator can offer peace of mind and comfort by keeping your essential systems running.
