Do You Have a Generator in Place - Battery backup systems generally cannot provide power to computer systems for an extended period. Hence, gas or diesel-powered generators often accompany them. When this is the case, your battery backup system only needs to supply power until the generator kicks in and the electricity flows again.

Battery backup devices have varying degrees of backup ability. To determine how powerful a UPS you need, first, use the OuterVision Power Supply Calculator to calculate your computer's wattage requirements. Take this number and add it to the wattage requirements for other devices you'll plug into the battery backup.

If you refuse to settle for anything less than the best, the APC Back-UPS PRO 1500VA is the right uninterruptible power supply for you. Its 1500VA/900W capacity should be more than enough for any modern gaming ...
