It takes almost 30-60 hours in the full sun to charge up the solar power bank through its integrated solar panels. Therefore solar power banks are best as a backup solution used to "top up" a device when other sources of power are unavailable. ... Everything you should know about solar power banks: using a solar panel to charge a portable ...

Product Specifications: Large Capacity & Durable Power Bank: With 36000mAh high; Equipped with 3 Detachable Charging Cables: This cable-free solar phone charger provides you 3 cables in total (1 USB C, 1 Micro USB cable, and 1 light-ning cable); Wireless Charging & Triple Output Ports: The solar charger power bank is compatible with all wireless-enabled devices.

Solar power banks are designed using solar panels on the sides that convert sunlight rays into direct current electricity, then transmit that energy through a controller to a lithium battery that stores the energy until it's ready to use. Again, solar energy is free, unlike fuel-reliant mechanical generators that need constant refilling.
