It is becoming more common to install solar batteries with solar panels, especially now as many people are taking a step of switching to solar as a source of energy as a result of load shading in Zimbabwe. Everyone wants to know the price of solar batteries because batteries are the most expensive pieces in a solar system .

You can purchase multiple batteries, but the number you need depends on the size of your system, the number of circuits that need to be backed up and the duration of backup you want. That's one reason why the majority of residential solar panel systems in the U.S. are "tied" to the energy grid instead.

To start with, lead- acid batteries have been used for decades and tend to be the cheapest solar battery option. Their prices range from \$220 to \$400 depending on size and capacity. However, because of their chemistry, they require more space per kWh storage than Lithium-ion batteries.

However, despite being relatively new and more expensive, lithium- ion batteries have quickly become the favorite solar energy storage option among some homeowners . Lithium-ion batteries are 95% efficient, have an average of 10 ears life span and they are also smaller and lighter than lead- acid batteries.
