

Big news on energy storage has arrived

We can keep the innovation pipeline flowing. We can get much closer to an abundant, affordable, clean energy future. Thanks to brilliant minds, big ideas, and bold investments, transformative climate tech has arrived. It's here in London. The Breakthrough Energy Summit is where the momentum that's been building since 2015 meets the marketplace.

The German government has opened a public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES). Under the proposed Kraftwerkssicherheitsgesetz, loosely translated as the Power Plant Safety Act, the Ministry for the Economy and Climate Change (BMWK) would seek resources, including 12.5GW of ...

The sector deployed 7,322MWh in Q3, 6,848MWh of which was in the grid-scale segment. Image: Wood Mackenzie. The US energy storage industry's upward growth trajectory has seen another record-breaking quarter, with 2,354MW and 7,322MWh of deployments in Q3 2023, according to Wood Mackenzie.

Energy-Storage.news" publisher Solar Media will host the 6th Energy Storage Summit USA, 19-20 March 2024 in Austin, Texas. Featuring a packed programme of panels, presentations and fireside chats from industry leaders focusing on accelerating the market for energy storage across the country. For more information, go to the website.

Francis Energy has more than 400 chargers across Oklahoma and is expanding nationwide. EVgo, which has one of the largest fast-charging networks in the United States, plans to more than double the ...

Among the key takeaways of the latest, 63rd edition, published this week is that US\$1.8 trillion was invested in clean energy worldwide in 2023, including a 507GW increase in installed capacity.. This was the biggest ever growth recorded in one year, and about two-thirds of that new capacity was solar PV.

Energy storage installations worldwide are forecast to total 358 GW/1,028 GWh by the end of 2030, more than 20 times greater than the 17 GW/34 GWh online at the end of 2020, according to the latest forecast from research company BloombergNEF (BNEF).

Rapid growth is leading to innovation. Companies are working to find more efficient ways to build lithium-ion battery systems, and are working to develop batteries that use different materials. The results may be useful across a battery economy that includes energy storage and electric vehicles.

The energy storage decade has truly begun, BloombergNEF analysts said a couple of months ago. The firm has predicted that there will be investment worth US\$262 billion in making 345GW / 999GWh of new energy storage deployments by 2030, adding up to cumulative installations of 358GW / 1,028GWh.

The first storage supergroup has arrived. Fluence, the new joint venture from major industry players Siemens

Big news on energy storage has arrived

and AES Energy Storage, kicked off operations at the start of the new year.

As installations of wind turbines and solar panels increase -- especially in China -- energy storage is certain to grow rapidly. They are part of the arsenal of clean energy technologies that will enable a net zero emissions future. Without them, the world will never be able to move away from fossil fuels entirely. How does it work?

See our previous coverage of the H2Hubs program here. The U.S. Department of Energy (DOE) on Oct. 13 named seven regional clean hydrogen hubs to receive \$7 billion in federal funding, a long ...

Battery storage has entered a new phase of rapid growth, brought on by falling prices for lithium-ion batteries and rising demand for electricity sources that can fill in the gaps ...

Norway-based Energy Nest is storing excess energy as heat in concrete-like "thermal batteries" for use in industrial processes. Heat for heavy industry is more typically ...

Energy-Storage.news reported earlier this week as one of those IOUs, Pacific Gas & Electric (PG&E), announced its own agreements with 6.4GWh of four-hour lithium-ion battery projects, including an expansion phase planned at Vistra Energy's Moss Landing Energy Storage Facility, the world's biggest lithium-ion battery energy storage system ...

Inverter and BESS firm Sungrow pointed out to Energy-Storage.news in a recent interview that its latest generation product increased the energy-per-container from 2.5MWh to 5MWh but the max noise emissions went from 79dB to 75dB. Energy-Storage.news" publisher Solar Media will host the 2nd Energy Storage Summit Asia, 9-10 July 2024 in ...

Just five years ago, a 20 megawatt battery storage project was considered big. Now a 300 megawatt project, the largest in the world, has gone online in California, and even bigger battery projects are coming in 2021. Battery storage has entered a new phase of rapid growth, brought on by falling prices for lithium-ion batteries [...]

"The Future of Energy Storage," a new multidisciplinary report from the MIT Energy Initiative (MITEI), urges government investment in sophisticated analytical tools for planning, operation, and regulation of electricity systems in order to deploy and use storage efficiently.

Our study finds that energy storage can help VRE-dominated electricity systems balance electricity supply and demand while maintaining reliability in a cost-effective manner -- ...

Let's get a picture of a carbon-neutral future. The U.S. is trying to change its electricity sources to produce fewer of the gases that contribute to climate change. The fight ...

Along with wind turbines and solar panels, shipping containers full of these batteries are set to become a more

Big news on energy storage has arrived

common sight in the future. That's because grid-scale storage is essential for helping renewables become the largest source of electricity over the next few decades.

Battery energy storage developer Eku Energy has reached a financial close for 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital Territory (ACT). ... Big Arizona solar and storage deals between Recurrent and APS, Avantus and D. E. Shaw ... Energy-Storage.News is part of the Informa Markets Division of Informa ...

The Winners Are Set to Be Announced for the Energy Storage Awards! Energy Storage Awards, 21 November 2024, Hilton London Bankside. ... Big Arizona solar and storage deals between Recurrent and APS, Avantus and D. E. Shaw. November 1, 2024 ... Energy-Storage.News is part of the Informa Markets Division of Informa PLC. Informa; About Us ...

Energy-Storage.news proudly presents our sponsored webinar with GridBeyond, on successful battery storage trading strategies in the ERCOT and CAISO markets. ... Campbell, California-based utility-scale solar and storage developer RAI Energy has commenced permitting for a hybrid solar and storage facility located in Morgan County, ...
