SMUD Energy Storage AB 2514 Report . 8/29/2014 Page 1 of 41 . 1 Executive Summary . AB 2514 requires evaluation of appropriate targets, if any, for electric utilities to procure viable and cost-effective energy storage systems. Public owned utilities (POUs), such as SMUD, must adopt these procurement targets by October 1, 2014, but only if

In 2010, the California Legislature authorized the CPUC to evaluate and determine energy storage targets, if any, for the State Load Serving Entities (LSEs) through Assembly Bill (AB) 2514 (Skinner, 2010). In 2013, the CPUC issued Decision (D.)13-10-040 which set an AB 2514 energy storage procurement target of 1,325 megawatts (MW) by 2020.

This bill would require the CPUC, by March 1, 2012, to open a proceeding to determine appropriate targets, if any, for each load-serving entity to procure viable and cost-effective energy storage systems and, by October 1, 2013, to adopt an energy storage system procurement target, if determined to be appropriate, to be achieved

relating to energy. [Approved by Governor September 29, 2010. Filed with Secretary of State September 29, 2010.] legislative counsel's digest AB 2514, Skinner. Energy storage systems. Under existing law, the Public Utilities Commission (CPUC) has regulatory authority over public utilities, including electrical corporations, as defined.

California's AB 2514 (2010) called on the state to establish an energy storage mandate. California's Public Utility Commission accordingly approved a 1.3GW storage target for the state to be achieved by 2020. The program's progress has been guided by the ISO 's California Roadmap for Advancing and Maximizing the Value of Energy Storage Technology.
