A new design of solar and battery inverters that can use in on-grid solar, off-grid solar and back-up systems. The LXP Hybrid implements a programmable and scheduled intelligent solar storage system. This power inverter battery can help increase your solar energy self-use and protect your home appliances from grid shortages.

Hybrid solar inverters offer the best of both worlds-on-grid and off-grid. If your solar generation is low, you can pull power from the grid. And when the grid is down, you can use your battery backup to power appliances! Unlike off-grid solar inverters, the hybrid solar inverters remain switched on at all times for an uninterrupted power supply.

In solar power systems, inverters play a crucial role in converting the DC power generated by solar panels into AC power to meet various power needs. As one of the largest solar markets in the world, China is home to many leading solar inverter manufacturers. Below are the top 10 solar inverter manufacturers in China's current market:
