

You actually featured a few Republican leaders who say it just makes economic sense to transition to clean and renewable energy, but they still aren't using the term climate change. PLUMER: That's ...

Achieving the United States' ambitious emissions reduction goals depends in large part on the rapid adoption of wind and solar energy and the electrification of consumer vehicles. However, misinformation and coordinated disinformation about renewable energy is widespread and threatens to undermine public support for the transition. In a new report, the Sabin Center ...

Published Oct. 3, 2024 Updated Oct. 29, 2024. As we report on climate change, it's all too easy to get caught up in the often troubling news. Ferocious storms wreak havoc around the globe....

March 20 marked the release of the final installment of the Intergovernmental Panel on Climate Change's (IPCC) Sixth Assessment Report (AR6), an eight-year long undertaking from the world's most authoritative scientific body on climate change. Drawing on the findings of 234 scientists on the physical science of climate change, 270 scientists on impacts, adaptation and vulnerability ...

Clean Energy In Final Rock Springs Resource Management Plan, BLM Sticks With Conservation Priorities, Renewable Energy Development The controversial plan would also place new limits on the terrain ...

Renewable energy, like wind power, is gradually replacing coal in many EU countries The European Union has announced a raft of climate change proposals aimed at pushing it towards its goal of ...

Citation: IRENA (2019), Climate Change and Renewable Energy: National policies and the role of communities, cities and regions (Report to the G20 Climate Sustainability Working Group (CSWG)), International Renewable Energy Agency, Abu Dhabi. About IRENA The International Renewable Energy Agency (IRENA) is an intergovernmental

5 hours ago#0183; The following information was released by Columbia University: "The world's capacity to generate renewable electricity is expanding faster than at any time in the last three decades," the International Energy Agency said in a report published earlier this year. This sign of growth offers "a real chance of achieving the goal of tripling global capacity by 2030 that ...

UN Climate Change News, 13 December 2023 - The United Nations Climate Change Conference (COP28) closed today with an agreement that signals the "beginning of the end" of the fossil fuel era by laying the ground for a swift, just and equitable transition, underpinned by deep emissions cuts and scaled-up finance. In a demonstration of global ...

2 days ago#0183; Donald Trump's return to the White House will refocus the nation's energy policy onto

maximizing oil and gas production and away from fighting climate change, but the Republican win in Tuesday's ...

The world has passed a clean energy milestone, as a boom in wind and solar meant a record-breaking 30% of the world's electricity was produced by renewables last year, new data shows.

News; Calendar; Follow. Share. Special and Methodology Reports. ... "But cities also provide opportunities for climate action - green buildings, reliable supplies of clean water and renewable energy, and sustainable transport systems that connect urban and rural areas can all lead to a more inclusive, fairer society." ... Climate Change ...

The Minnesota Energy Infrastructure Permitting Act could streamline the regulatory approval process for clean energy projects. Credit: Michael Siluk/UCG/Universal Images Group via Getty Images

The future savings more than offset present investments to the extent that the transition would make sense from a purely economic standpoint even if we weren't worried about climate change.

Climate change is one of the major concerns all over the world. It adversely affects aquatic ecosystems along with flora fauna and human beings. Economic development and energy demand cannot be compromised so the only way to combat climate change is renewable energy. Harnessing of renewable energy is emphasised all over the world.

Energy lies at the core of the climate challenge -- and holds the key to its solution. Most greenhouse gases responsible for causing global warming are produced by burning fossil fuels for electricity and heat.. Scientists widely agree that it's crucial to cut global greenhouse gas emissions by nearly half by 2030.They also emphasize the importance of achieving net zero ...

The report also points out that today, improved technology makes the transition to renewable energy "cheaper and more accessible than ever". Warmest years on record . The State of the Global Climate report complements the Intergovernmental Panel on Climate Change Sixth Assessment report released a month ago, which includes data up to 2020.

2 days ago· The Lagos State Government (LASG) has commended the Renewable Energy Association of Nigeria (REAN) for its advocacy in promoting renewable energy solutions as a key response to Nigeria's energy crisis. Mr Abiodun Ogunleye, Commissioner for Energy and Mineral Resources, said this in his keynote address at the 2024 Renewable Energy Conference ...

UN Climate Change News, 18 January 2023 - The uptake of renewable energy is moving faster and further than projected but radical action is still needed to accelerate the energy transition. Speaking at the International Renewable Energy Agency (IRENA) Assembly in Abu Dhabi last weekend, UN Climate Change Executive

Secretary Simon Stiell said the positive ...

The world is on an "unstoppable" shift towards renewable energy but the phase down of fossil fuels is not happening quickly enough, a new report says. The International Energy Agency, the global ...

Achieving the United States' ambitious emissions reduction goals depends in large part on the rapid adoption of wind and solar energy and the electrification of consumer vehicles. However, misinformation and coordinated ...

This weekly round-up contains key nature and climate news from the past week. Top nature and climate stories: Scientists foresee at least 2.5°C of global heating this century; ...

The Muara Laboh Geothermal Power Project is helping advance Indonesia towards its renewable energy and climate change mitigation goals. UN chief announces plan to speed up progress In a video message released on Monday, UN Secretary-General António Guterres described the report as a "how-to guide to defuse the climate time-bomb."

Almost 200 countries strike a landmark deal to launch a fund to support nations worst-hit by climate change. Poor countries had been pushing for 30 years for rich countries to help foot the bill ...
