

Custom power steering systems

A power-steering system should assist the driver only when he is exerting force on the steering wheel (such as when starting a turn). When the driver is not exerting force (such as when driving in a straight line), the system shouldn't provide any assist. The device that senses the force on the steering wheel is called the rotary valve.

Find the perfect EPAS Performance Power Steering System for your classic ride now, at Summit Racing. EPAS Performance electric power steering systems are compact and easy to install, ...
