

# Did god create the solar system

God gave his ONLY begotten son to die for our sins. From these three passages alone you can infer that God only created life here on Earth. OR at least he only created beings like us on Earth, in other words there wouldn't be other life out there capable of building spaceships, or other life that has MORALS and the knowledge of good and evil.

God did not create them; they have always existed and will always continue to exist. From a scientific point of view we might say that matter and energy are eternal, since matter and energy are interchangeable--one can be converted to the other, but neither can be destroyed, as Einstein's famous equation  $E = mc^2$  illustrates.

Another reason is that they illustrate the vastness and complexity of God's creation. For example, in Psalm 8:3-4, the Psalmist marvels at the stars in the sky and ponders the question of humanity's place in the world: "When I consider your heavens, the work of your fingers, the moon and the stars, which you have set in place, what is mankind that you are ...

We know that stars and planets outside our solar system exist, and these, too, were created for the glory of God. A constantly expanding universe is yet another conjecture that has yet to be proven.

The ages of the universe, our galaxy, the solar system, and Earth can be estimated using modern scientific methods. The age of the universe can be derived from the observed relationship between the velocities of and the distances separating the galaxies. ... Many religious persons, including many scientists, hold that God created the universe ...

A principally new view on the constitution of the Universe, the Solar System, and the Earth on the basis of a correct scientific reading and understanding of the Holy Scripture is proposed alongside with the interpretation of the God's message in the form of the Bible, which is started from the book of Genesis describing the creation of the world and the life of the first ...

Did God use the "Big Bang" to create the universe? The idea itself--that the universe came into existence in an instantaneous expansion--is compatible with biblical creationism, as long as there is recognition that the ingredients and forces of the big bang were created by God "out of nothing" (see Hebrews 11:3).

Genesis 1:14 you can read and see what i am referring to. everything was created for His glory and for His pleasure. when we look at His creation, we wonder in awe and amazement. in doing this, we are seeing how God created all of this with great power etc. this is giving glory to God. glory means splendor and honor.

And one of the remarkable pieces of evidence for a Designer God is the pinpoint detail that perfectly placed the earth in the solar system. We live in a Goldilocks universe . Everything about our earth is "just right" for life to flourish.

# Did god create the solar system

In the 1590s, Johannes Kepler said to himself that God's design for the universe must be aesthetically pleasing, regular, and logical. Kepler trusted God to have wanted His universe to have these properties. Following this line of thinking, Kepler reasoned that since the sun is by far the largest body in the solar system, God

The only reasonable conclusion is that God did not create the stars and galaxies throughout the cosmos or the many biological organisms in the world purely with mankind in mind; rather, God appears to have created a lot of galaxies because He likes creating them.

When it orbits (goes around) the sun once, that makes one year. The nine planets that orbit our sun make up our solar system. There are many solar systems in the universe. Some say the sun, moon, stars, and even our earth happened accidentally. They do not believe that God created our world. They do not believe God's word--the bible.

God spoke and the universe came into existence. The Hebrew term used in Psalm 33:9 is even more descriptive. It is the Hebrew verb *tsavah*, which means "to command, charge, give orders, lay charge, give charge to, to order." God commanded by giving an order for the universe to come into being and that is precisely what transpired.

In the Bible it clearly states: In the beginning God created the heaven and the earth. (Genesis 1:1) and then in the same chapter: And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also.(Genesis 1:16)

makes one year. The nine planets that orbit our sun make up our solar system. There are many solar systems in the universe. Some say the sun, moon, stars, and even our earth happened accidentally. They do not believe that God created our world. They do not believe God's word--the bible. Sometimes, people try to guess how the world was made ...

The question of whether God created life on other planets is certainly fascinating. Psalm 19:1 says that "the heavens declare the glory of God, and the firmament shows His handiwork." Everything that God has made, be it you and me, or wildlife, or angels, or stars and planets, has been created for His glory.

4 days ago; And like that, the solar system as we know it today was formed. There are still leftover remains of the early days though. Asteroids in the asteroid belt are the bits and pieces of the early solar system that could never quite form a planet. Way off in the outer reaches of the solar system are comets.

God made the sun, moon, and stars. Memory Verse: " So God made the two large lights. He made the brighter light to rule the day. He made the smaller light to rule the night. He also made the stars." Genesis 1:16, ICB Before the fourth day, there was a type of light, but on this day, God created the sun to give a bright light that was called day.

# Did god create the solar system

Our lives are to be telescopes for the glory of God. We were created to see his glory, be thrilled by his glory, and live so as to help others see him and savor him for what he really is -- to know, to love, to show his glory. That is why the universe exists.

God's first plan for the solar system was seen as stable but not unchanging. This could have changed after humanity's Fall. Some think that if things decayed faster, it could power geological changes in the solar system. "By faith we understand that the universe was created by the word of God..." - Hebrews 11:3

There are no valid scientific data or calculations to substantiate the belief that Earth was created just a few thousand years ago. This document has summarized the vast amount of evidence for the great age of the universe, our galaxy, the solar system, and Earth from astronomy, astrophysics, nuclear physics, geology, geochemistry, and geophysics.

How did God create the earth? "For in six days the Lord made heaven and earth, the sea, and all that in them is, and rested the seventh day:" -- Exodus 20:11. He did it in six solar days (a solar day is the length of time that ...

Outer space and planets were fashioned for God's glory. We are aware of the existence of stars and planets beyond our solar system, and these, too, were created for the purpose of glorifying God. The concept of an ever-expanding universe remains a hypothesis that has yet to be substantiated. The nearest star beyond the sun is located at a ...

The only reasonable conclusion is that God did not create the stars and galaxies throughout the cosmos or the many biological organisms in the world purely with mankind in mind; rather, ...

Did God create life on other planets? December 25, 2017. Share. Link copied. Did God create life on other planets? The Bible teaches that the Earth is the only place in God's creation where life exists since all things in the universe were created specifically for man. All other celestial bodies besides Earth are merely adornment of man.

The Bible makes no claims regarding the orbital dynamics of the solar system, so there is no case to be made from scripture in the matter you mentioned. ... Did God create life on other planets? Bible Answer Was the flood the end of God's curse on the earth? Studies. New Testament Books; Old Testament Books; Single Teachings; Topical Series ...

Uranus, the first planet discovered by telescope, rotates on its side and has the coldest atmosphere in the solar system. Meanwhile, Jupiter's storm seems like a nice summer breeze compared to Neptune's winds. These gales regularly blow across the bluish planet with speeds exceeding the sound barrier (as measured at Earth's surface).

In this system, planets occasionally pass each other. This explains the apparent backward motions (see

## Did god create the solar system

Diagram 2). Some very high-ranking churchmen in the late Middle Ages (14th and 15th centuries) discussed this idea. Then Nicolaus Copernicus (1473-1543), a Polish church officer, published a famous book promoting the sun-centred solar system.

Like, Did the Christian god create the entire Universe with trillions of planets and then only do anything with earth? Or is the Christian god only god for our planet? Or maybe our solar system specifically. Sorta wondering if god has a jurisdiction when it comes to the known universe, and other planets like mars etc.

Before the fourth day, there was a type of light, but on this day, God created the sun to give a bright light that was called day. He also created the stars and moon we see in the night sky. Because of this, there could be seasons and time as ...

While all Christians believe that the universe was created by God ... "Day" is a relative term. A day on earth is a different span of time than a day on any other planet in our solar system. It must be remembered that that which determines our earth days, the sun, was not even functioning until the fourth day of the biblical account ...
