It is a sealed design with two 12-inch woofers and an 800-watt DSP-controlled amplifier. The anechoic response is 12 - 150 Hz (+/-3 dB). I suspect the in-room response is a couple Hertz lower based on my experience. The amplifier is unique to Axiom products. It has a max output of 800 watts RMS to drive the twin 3-inch voice coils in each ...

The math says that the additional 9 dB of SPL requires 8 times more power, or 800 watts from the amplifier, to accurately reproduce the loudest sounds in the movie or music without compression. So, it is easy to see why ...
