Hybrid energy storage systems (HESSs) play a crucial role in enhancing the performance of electric vehicles (EVs). However, existing energy management optimization strategies (EMOS) have limitations in terms of ensuring an accurate and timely power supply from HESSs to EVs, leading to increased power loss and shortened battery lifespan. To ensure an ...

Forum rules SCS as a company do not wish to have paid mods on this forum. While we understand that not all paid mods use the Intellectual Property of other companies/people, it is very hard to moderate what is and isn't acceptable when money is involved. There are also concerns that it could look unfavorable to potential work partners ...
