Only about 1/4 want to store dumbbells, kettlebells, etc on their rack. It seems like many would much rather have a pulley-system on their racks vs. a storage system. 2:1 is the ideal "functional trainer" pulley ratio on a power rack for the majority.

I already have a lat pulldown machine so I set out to build a crossover system to the power rack. Went to the Home Depot and picked up 8" brackets meant for shelving. They come with two predrilled holes on each side and luckily the spacing happened to match the predrilled unused holes in the Titian T-2 shorty power rack (I'm assuming it's ...
