

Do solar companies have to pigeon proof your home

If you've recently installed solar panels onto the roof of your home or business you know that those panels are not cheap, and making the most of your investment means exploring bird proofing solar panel options. Going solar is a great way to reduce your carbon footprint as well as decrease your monthly utility bill, however they have a large upfront cost.

Ideally it is better to have pigeon proofing installed at the time your solar panels system is installed. If you are going to retrofit some, it is important to choose a company with experience at working at heights and removing birds and pigeons carefully when getting solar panel bird proofing installed.

Remember that addressing the pigeon problem preserves the efficiency and longevity of your solar panels and ensures the safety and health of your home and those living in it. By taking the appropriate steps, you can enjoy the benefits of solar energy without the inconvenience of pigeons under your panels.

How does pigeon-proofing solar panels work? Pigeon-proofing solar panels involves building a barrier between the panels and the roof. To achieve this, install a border around the perimeter of the solar panels to prevent pigeons from gaining access. Unfortunately, once pigeons have made a home on your roof, getting rid of them can be hard work.

Pigeon-proofing your solar panels is a critical component of maintaining your solar panel system and keeping it in good working order. ...
