Modern Power System Analysis | 5th Edition : D P Kothari, I J Nagrath, R K Saket: ... Nagpur and VIT University, Vellore. Dr. Kothari obtained his B.E. in Electrical Engineering in 1967, M.E. with specialisation in Power Systems in 1969 and Ph.D. in 1975 from Birla Institute of Technology & Science, Pilani (Rajasthan) India. ...

One line diagram of a two-bus system From figure 1, the line losses between the receiving and sending end buses P_{loss} (i), can be calculated using "Kothari and Dhillon [23]", given the operational ...

This book, now in its second edition, presents a comprehensive exposition of the basic principles involved in the analysis and computation of power system transients using a statistical approach. The book deals with probability distribution of switching overvoltages in overhead lines, underground cables, and machine windings. The accuracy of statistical methods for power ...

This hallmark text on "Power System Engineering" has been revised extensively to bring in several new topics and update the contents with the latest technological developments. The book now covers the complete undergraduate syllabus of Power System Engineering course. All topics are supported with examples employing two/three/four bus structures.

This hallmark text on Power System Engineering provides the readers a comprehensive account of all key concepts in the field. The book includes latest technology developments and talks about some crucial areas of Power system, such as Transmission & Distribution, Analysis & Stability, and Protection & Switchgear.
