

# Dualdrive electric power steering system

The first Electric Power Steering (EPS) production series appeared over 30 years ago in the 1988 Suzuki Cervo. However, there was a fail-safe contingency of hydraulic steering should the EPS system fail. Now, electric power steering ...

To solve the power limitation problem faced by the development of EPS system for commercial vehicles and achieve the high-performance steering, this article presents a novel dual power-driven electric power steering system (DPEPS) for commercial vehicles by using the open winding permanent magnet synchronous motor (OPMSM) fed by dual inverter with high and ...

TSBs can be a real help for Ucodes. TSB 07-02-32-007B: Diagnostic Tips for Power Steering Inoperative/Steering Wheel Hard to Turn, Power Steering Message Displayed on DIC, DTCs C0176, C0475, C0476, C0550, U2105, U2107 Set - Aug 6, 2009 provides good diagnostic tips for diagnosing EPS-related DTCs (and it's short too!).

The Electric Power Steering System Single Pinion Servo Unit (EPSp) controls and assists the vehicle steering and offers an excellent steering feel. The new generation of steering control unit (electro motor and electric control unit) provides additional security in case of a failure.

Electric power steering (EPS) is a vehicle steering system that uses an electric motor to assist the driver in turning the wheels. This system replaces the traditional hydraulic ...

Hydraulic Electric Power Steering (HEPS) systems offer a combination of benefits and drawbacks when compared to traditional hydraulic power steering systems or fully electric power steering systems. Understanding the advantages and disadvantages of HEPS can help drivers make informed decisions. Here's an overview: Advantages of HEPS: 1.

In this paper, the torque and power required by dual motors for electric tracked vehicle during dynamic steering maneuvers with different steering radiuses are analyzed. A steering coupling drive system composed of a new type of center steering motor, two Electromagnetic (EM) clutches, two planetary gear couplers, and two propulsion motors is ...

In order to study the electric power steering system (EPS) which is suitable for the steering characteristics of commercial vehicles, the effect of weight on steering performance is analyzed, and a dual-motor full-weight EPS system is proposed. Firstly, the full-weight assist characteristics are studied, and two current distribution schemes and corresponding fault ...

Pinion-Assist Electric Power Steering (PEPS) expands the application range and flexibility compared to Column-Assist EPS (CEPS). Our PEPS systems position the motor, controller and assist mechanism on the steering gear pinion shaft. Nexteer is currently the global market leader in Single Pinion-Assist EPS (SPEPS).

The EPS system will offer extra steering power if the torque sensor notices that the driver has supplied a sizable amount of torque, showing a desire for more steering effort. On the other hand, if there is little torque being applied ...

Consequently, electric power steering systems are generally smaller and lighter than hydraulic power steering systems. In addition, they have variable power assist. These systems are more expensive and are used in sports- and luxury cars. Let's understand its components in detail below.

Electric Power Steering system (EPS) is a kind of Power Steering system with the auxiliary force provided by a motor [1]. In the current research and development process of EPS, most of the experiments will be carried out after software integration, including hardware-in-the-loop (HIL), vehicle tuning, durability ...

Aiming at the problems of unsatisfied control consistency and slow steering response in the steering process of dual-motor drive electric tracked vehicles (2METVs), a novel steering control strategy for the dual-motor coupling drive system is proposed in this paper. By analyzing the motor torque and power required by dynamic steering for 2METVs, a permanent ...

The aim of this paper is to solve the problem of insufficient propulsion motor torque in low-speed, small-radius steering and insufficient power in high-speed large-radius steering.

Page 103: Dualdrive Electric Power Steering 44) If the transmission is faulty, contact a characterised by less effort on the Fiat Dealership as soon as possible to have steering wheel (Dualdrive system on) the system checked. and ...

Fig.2. Power coupling steering drive system configuration 3.2 .Planetary Gear Coupling Structure Design The dual motor power coupling steering system is designed as Fig.3. When the 2MCDS is activated,

Aiming at the unreasonable determination of the power coupling device speed ratio and the power battery capacity in the initial design stage of the dual-motor electric tractor, a dual-motor drive system is designed, and a parameter optimization method based on driving cycles (POMBDC) is proposed. By analyzing the driving characteristics requirements and actual ...

Page 95 DUALDRIVE versions/markets where provided, the WARNING electronic clutch control could cut in, ELECTRIC POWER interpreting the incorrect driving style STEERING 124) It is absolutely forbidden to carry as a fault. out any after-market operation involving steering system or steering column WARNING

While driving in 6 th (for versions ...

Study with Quizlet and memorize flashcards containing terms like The two basic types of electric power steering include \_\_\_\_\_. The advantages of electric power steering compared to hydraulic power steering include the following EXCEPT: What type of motor is used in most electric power steering systems? and more.

The first Electric Power Steering (EPS) production series appeared over 30 years ago in the 1988 Suzuki Cervo. However, there was a fail-safe contingency of hydraulic steering should the EPS system fail. Now, electric power steering uses an electric motor that draws energy from the vehicle's electrical system to provide steering assistance.

Page 103: Dualdrive Electric Power Steering 44) If the transmission is faulty, contact a characterised by less effort on the Fiat Dealership as soon as possible to have steering wheel (Dualdrive system on) the system checked. and reduced fuel ...

Especially, more power of outer side motor is required for dynamic steering. So an energy efficient power coupling steering system is proposed for the 2METV dynamic steering in the paper. 2. Mathematical Model for Dynamic Steering The electric drive system configuration of 2MIETV is shown in Figure 1, which is widely used in the 2METV.

In terms of race modes and sports buttons within performance cars of the last decade, EPAS systems allow adjustments to be made in the weight and speed of the steering input simply by changing...

VDP is an oil pump for power steering used to achieve energy savings by eliminating a pump's excessive operation as well as reducing driving torque by variably-controlling the displacement automatically corresponding to the pump speed. e-VDP achieves even greater energy saving by electronically-controlling the discharge flow rate in accordance with certain vehicle parameters ...

This study proposes a new dual power-driven electric power steering system (DPEPS) for electric commercial vehicles based on OPMSM, which provides a new solution to the power limitation problem faced in the ...

Dualdrive is the trade name of a sophisticated [1 ] system power steering electrically, fitted as standard in some cars of AB and C segments marketed by Fiat Auto since 1999. It has two operating modes, and uses the power generated by an electric motor, instead of that provided by a hydraulic pump driven directly by the motor s advantages compared to an electric power ...

VERSION WITH LPG IMPORTANT The Dualdrive electric When the power steering is on, the power steering has an electronic steering wheel effort is lighter, making SYSTEM damping effect while approaching the parking easier: ...

Page 63 MESSAGES ON INSTRUMENT PANEL Messages What it means "DUALDRIVE" ELECTRIC POWER STEERING SYSTEM ACTIVATION The indication CITY switches on when the "Dualdrive" electric power steering ...

DENSO Corporation today announced it has developed a new Electric Power Steering Motor Control Unit (EPS-MCU), delivering improved handling and safety to vehicles. It is featured in TOYOTA NEW HARRIER, which was released in June 2020, and will be featured in cars of various automakers.

Development of Electric Power Steering Evaluation System a little bit more about how the Dual pinion EPS works. EPS generally consists of the components shown in Fig. 1. The operating sequence is as follows: (1) Driver operates the steering wheel. (2) The wheel steering power (hereinafter "steering torque") is received by the stub shaft.

As consumers' vehicle preferences evolve, vehicle designs must adapt to support these changing needs. With increased demand for electric and utility vehicles globally, suppliers are tasked with developing systems that can ...
