Switching's easy, the only thing that changes is customer service and who bills you. It's the same gas, same electricity and same safety. Your supply always stays on and no one visits your home unless you want or need smart meters.. And following changes to switching rules in 2022, you can now switch in just five working days (or pick a future date for your switch to happen).

In the tradition, the energy storage system is regarded to be connected with a fixed bus and thus non-transportable. In this paper, we consider the battery energy storage mobility. As shown in Fig. 1, a battery energy storage system can be transported to another bus if required with the cost of delivering time and transportation cost.
