Supercapacitors - Download as a PDF or view online for free. 5. History The first supercapacitor based on a double layer mechanism was developed in 1957 by General Electric using a porous carbon electrode [Becker, H.I., "Low voltage electrolytic capacitor", U.S. Patent 2800616, 23 July 1957]. It was believed that the energy was stored in the carbon pores and it ...

5. For a sensible heat storage system, energy is stored by heating a liquid or a solid. Materials that are used in such a system include liquids like water, inorganic molten salts and solids like rock, gravel and refractories. The choice of the material used depends on the temperature level of its utilization.
