

The two projects (pictured) are sited at a Southern California Edison substation in Santa Ana, California. Image: Convergent Energy + Power. Convergent Energy + Power has celebrated the successful commissioning and start of commercial operations at two battery energy storage system (BESS) projects with a combined capacity of 60MWh in California, US.

The pipeline for utility-scale battery storage in the UK has been continually increasing and is now over 20GW across more than 800 projects. A recent surge in submitted applications for battery storage has led to a record breaking quarterly submitted capacity for ...

Artists impression of CAES station site towards the northern end of Islandmagee. Credit: Gaelectric. Ireland-based renewable energy and storage firm Gaelectric has formally filed a planning application and environmental impact assessment for its 330MW compressed air energy storage (CAES) project in Northern Ireland.

The last grid-scale BESS that Energy-Storage.news reported on in Brazil was a 30M/60MWh non-wires alternative (NWA) project from transmission system operator (TSO) ISA CTEEP. Energy-Storage.news" publisher Solar Media will host the 3rd annual Energy Storage Summit Latin America in Santiago, Chile, 15-16 October 2024. This year's events ...

1 · The Australian arm of London-headquartered Elgin Energy is currently in the early stages of progressing a proposed 200,000 solar panel, 125 MW agrivoltaic array and 500 MWh battery energy storage system (BESS), 42 kilometres northeast of Albury, New South Wales (NSW).. According to an initial scoping report, the proposed Morven solar farm has an estimated capital ...

This energy storage target complements its existing renewable energy generation target, which aims to have 95% renewable energy in the energy mix by 2035. Victoria's minister for energy and resources, Lily D'Ambrosio, said streamlining the planning approval process for projects such as the Joel Joel BESS will be crucial for grid stability ...

Strategic Power Projects managing director Paul Carson. Image: Strategic Power Projects. Ireland's national planning body An Bord Pleanàla has approved a EUR140 million (US\$135.7 million) proposed battery storage facility set to be developed by Strategic Power Projects at Dunnstown, County Kildare.

Owner Vistra Energy has announced the completion of work to expand its Moss Landing Energy Storage Facility in California, the world's largest lithium battery energy storage system (BESS) asset. Power generation and retail company Vistra said yesterday (1 August) that the Phase III expansion achieved the start of commercial operations near ...

Project planning activity for new utility-scale energy storage projects in Ireland started to gain traction at the

Energy storage project planning news

start of 2017, driven by sites with >20MW capacity. The graphic above shows how the pipeline for utility-scale battery storage projects in Ireland has evolved by around 25% in the past few years.

Correction 11 November 2024: A representative of Tenasaka and CIP reached out to Energy-Storage.news after publication and noted that while Green Bay Plan Commission members Ken Rovinsky and Jacob Miller moved and seconded, respectively, to recommend approval for the Conditional Use Permit, conditional on compliance with municipal code ...

"The Future of Energy Storage," a new multidisciplinary report from the MIT Energy Initiative (MITEI), urges government investment in sophisticated analytical tools for planning, operation, and regulation of electricity systems in order to deploy and use storage efficiently.

The list of projects is therefore long and includes a wide variety of initiatives, technologies and mitigation measures alongside the hundreds of (mostly) solar-plus-storage microgrids, including enhancements to the grid from software to high voltage DC hardware level, better integration of distributed energy resources (DER), direct wildfire ...

The Moss Landing Energy Storage Facility could eventually host 1,500MW/6,000MWh of batteries, Vistra said. Image: LG Energy Solution. Plans to nearly double the output and capacity of the world's biggest battery energy storage system (BESS) project to date have been announced by its owner, Vistra Energy.

The project in Goleta, California, as it looks under construction. Image: Gridstor. Updated 8 June 2023: Gridstor VP of policy and strategy Jason Burwen offered some more details on the project to Energy-Storage.news. The Goleta facility is a merchant resource, but has a resource adequacy (RA) contract with utility Southern California Edison (SCE), he said.

Image: Vector Energy. Development approvals have been granted for New Zealand's biggest planned battery energy storage system (BESS) to date. The 100MW battery storage project is in development by electricity generator and retailer Meridian Energy at Ru?k?k? on New Zealand's North Island.

DOE should increase the use of demonstration projects in all ESGC areas to more rapidly evaluate the ... Draft 2021 Five-Year Energy Storage Plan: Recommendations for the U.S. Department of Energy Presented by the EAC--April 2021 4 including not only batteries but also, for example, energy carriers such as hydrogen and synthetic fuels ...

The Combined Heat and Power Energy Storage Project (CHP/ES) is an example of the long-term energy vision for the college coupling together energy efficiency, reusable energy and energy storage which will lead to energy savings, resiliency and learning opportunities to the campus community and beyond.

A 200MW battery energy storage system (BESS) to be located in Heysham, Lancashire, northern England, has secured planning permission. Forming part of a wider 1GW portfolio under development by Kona Energy, the

BESS has been strategically located to participate in multiple energy markets and is situated at the landing point of six offshore wind ...

Nippon Koei is active in battery storage markets in other countries including the UK. Image: Yuso via Twitter. Financial close has been reached for a 25MW / 100MWh battery energy storage system (BESS) project in Belgium which has also been successful in a grid capacity auction alongside gas-fired power plants.

Maoneng's rendering of the Gould Creek project by a substation in Parra, South Australia. Image: Maoneng. A 225MWp / 450MWh battery energy storage system (BESS) project has been granted development approval by the Minister for Planning and Local Government in South Australia.

Updates and announcements of the latest energy storage news in the renewables market. ... Eos Energy Enterprises, Inc. has announced a new customer agreement with City Utilities to provide 216 MWh of energy storage for two project sites in Missouri. ... Aukera Energy has received planning consent for 45 MW solar and 40 MW BESS in South Ayrshire ...

Anglo-American flow battery provider Invinity Energy Systems was awarded funding for a 40MWh project. Image: Invinity Energy Systems. The first awards of funding designed to "turbocharge" UK projects developing long-duration energy storage technologies have been made by the country's government, with £6.7 million (US\$9.11 million) pledged. ...

Hydrostor Inc., a leader in compressed air energy storage, aims to break ground on its first large plant by the end of this year. A rendering of Silver City Energy Centre, a compressed air energy storage plant to be built by Hydrostor in Broken Hill, New South Wales, Australia. Credit: Hydrostor

MITEI's three-year Future of Energy Storage study explored the role that energy storage can play in fighting climate change and in the global adoption of clean energy grids. Replacing fossil fuel ...

The report advocates for federal requirements for demonstration projects that share information with other U.S. entities. The report says many existing power plants that are being shut down can be converted to useful energy storage facilities by replacing their fossil fuel boilers with thermal storage and new steam generators.
