Solar PV Roof. Why not make use of the whole of your roof? Whole roof solar systems mean that your Solar PV panels become the fabric of your roof, serving two purposes, weather proofing and energy supply. The Solar PV panel frames are bespoke for the mounting system so there is a limited choice of panels with these set ups.

More than 4600 solar modules, installed on an area of around 1.5 soccer fields, will supply the Hilti Campus with solar power in the future. Starting end of August, solar panels with a total output of around 1.7 MWp will be installed on about 9000 m2 of Hilti's Schaan location.

Solar panel mounting system on roof of Pacifica wastewater treatment plant. Photovoltaic mounting systems (also called solar module racking) are used to fix solar panels on surfaces like roofs, building facades, or the ground. [1] These mounting systems generally enable retrofitting of solar panels on roofs or as part of the structure of the building (called BIPV). [2]
