

Home backup power permit

An automatic backup generator is a back up electrical system that operates whether you are home or away. Within seconds of an outage, it automatically supplies power directly to your home's electrical circuit breaker box. After utility power returns, the generator shuts itself off and waits for the next outage.

Solar power and battery back-up increases the value of your home and makes it more marketable. Increase your home's value. Once installed, solar panels and battery back-up in Michigan are surprisingly low maintenance. ...
