Most solar panels installed in 2023 have a power output between 370 and 400 watts. When you install high-wattage solar panels, you need fewer solar panels to generate the electricity needed to power your home. The average home needs between 15 and 19 panels to cover its electricity usage, but it will vary from home to home!

Solar energy may lessen your utility costs by 30-50% as you generate your own electricity from a home solar energy system. With solar panels on your home, you can use electricity for free during the day. As an alternative energy source, solar panels in homes in the Philippines help reduce the use of non-renewable energy.
