These batteries will usually have some juice left to power clocks and remotes around the house. Lithium AAs will always show 100% life, even when they're just about dead. They actually run "hot" compared to alkys at 1.7v. But as they wear down they continue to stay at 1.7 volts. This is hugely why lithiums are recommended for trail cameras.

Pretty sure the panel has a lithium battery built in and it charges that. The normal Batteries are just backup. 100% battery showing over many day/night cycles is likely an indication that the charging during the day is overcoming any day/nighttime power consumption. Or said another way it's taking in more power than it's losing.

To properly charge the LiPo pack, you will want to pull it out of the camera and charge the pack with a USB-C charger and a 5V charging block. You cannot charge the pack while it is inside of the camera and if you try to use a rapid block or computer to charge the pack it will not charge. If you get a solid red light on the battery pack, you ...

The Tactacam REVEAL Lithium Cartridge is a long-life rechargeable battery for Reveal Cameras. The Cartridge is charged with the included 5V Type C USB cable. For best performance charge completely before using.

Get a cheap battery tester, a volt meter is not a great choice for testing batteries, I had a camera that went down very fast with lithium, when I checked the batteries I found one that was bad, I replaced that one and the camera lasted the entire season plus.

External battery chargers like solar panels are worth considering. Set up your trail camera wisely by adjusting settings for optimal battery life. With these tips and recommendations, you're all set to make informed decisions about the batteries for your REVEAL cell cam.
