Solar PV array sizing (kW) Pass through power (A) Battery selection and sizing (kWh) ... (AC) power rating must be the same as the inverter-charger AC power rating. A 5kW solar inverter is the largest size and can be AC-coupled with a 5kW Multiplus inverter charger. Note that more solar can be added using DC-coupling with a Victron system.

The PV disconnect allows the DC current between the modules (source) to be interrupted before reaching the inverter. The second disconnect is the AC Disconnect. The AC Disconnect is used to separate the inverter from the electrical grid. In a solar PV system the AC Disconnect is usually mounted to the wall between the inverter and utility meter.
