Ice slurry is a mixed fluid composed of small ice crystals and water (or aqueous solution), which has good fluidity, and can be used as secondary refrigeration and cold storage medium (Leiper et al., 2013; Wang et al., 2019; Zhang et al., 2021).

Among all the schemes, the refrigeration-ice storage system had the lowest energy consumption (CO₂ emissions) and cooling cost. Compared with absorption refrigeration, absorption refrigeration-ice storage decreased energy consumption (CO₂ emissions) by 8.31 %, operating costs by 27.41 % and life cycle cost by 32.35 %. This is because ...
