5 days ago· SolarTower is the first self-climbing Ipomoea on the market. It keeps growing straight up, reaching for something to grab so it can keep climbing. Large black leaves on tall plants create lush spires to mark an entryway or cover an arching trellis. Specifications. Light: Sun; Height: 4 to 6 feet; Spread: 3 to 4 feet;

Ipomoeas are great additions to combination planters, but they can sometimes overwhelm less vigorous plants. If you are like me you can let your combination plants duke it out Darwinian style, however, if you prefer to keep a more balanced look to your combination planters, you can cut back or remove stems at any time.

Flowers have petals that are lavender to pale purple or white, forming a trumpet shape up to 7 cm long, often darker in colour inside the tube. The sweet potato is the tuberous root of the plant. "Solar Tower Black" is a fast-growing, self-climbing plant, suitable for growing up a trellis or wall. Contributed by @ShelleySnyder

Find SolarPower Black Sweet Potato Vine (Ipomoea batatas "SolarPower Black") in Lorette West, Manitoba (MB) at C & S Country Gardens. Search our extensive selection of trees, shrubs, vines, ground covers, annuals, perennials, ferns, and ornamental grasses.

SolarPower Black Sweet Potato Vine is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. Because of its trailing habit of growth, it is ideally suited for use as a "spiller" in the "spiller-thriller-filler" container combination; plant it near the edges where it can spill ...

Ipomoea batatas "Solar Power Black Heart" Sweet Potato Vine. Photo Courtesy of Ball Seed. Early growth deep purple changes to deep black; Heart shaped leaves; Good for container accents; Border or Bed. Container. Drought Tolerant. Great Foliage. Heat Tolerant. Low Maintenance. No Deadheading.

So keep your Solar Power ipomoea moist when you are finishing them, but not saturated. At Ball FloraPlant we refer to the 1 to 5 scale for soil moisture with 5 being saturated and 1 completely dry. See Figure 3 for the Ball Substrate Moisture Level table so you can use it when producing SolarPower ipomoea. Try to allow for dry cycles in between ...
