A 2.6 MW Nexamp solar farm located at Rockford, Illinois. Image source: Nexamp Solar Nexamp Solar is a growing community solar provider with an irresistible pitch to consumers: you can be part of a green energy project and save you money on your energy bills, all without any upfront costs or hassle.

Here's how Nexamp community solar works: You subscribe to a share of a local Nexamp solar farm. The Nexamp solar farm then feeds clean power into your community's electricity grid while earning energy credits for you. Your utility applies the Nexamp-provided energy credits to your electricity bill, reducing your electricity costs.

Nexamp builds community solar installations that people can subscribe to and offset a portion of their electric bills. A subscriber gets credit for the energy their dedicated solar panels generate, which Nexamp says saves people between ...

option?

Hint M10 - Solar Motor. The K"NEX Solar motor may be powered via the K"NEX Solar panel. The motor runs at low voltage, and will turn quickly whether sunlight or the light from a 100w light bulb falls on the solar panel. A few K"NEX sets include solar motors. They can also be bought as individual items in our K"NEX shop.
