

Pacific power renewable energy

Blue Sky's Block allows you to support renewable energy equal to any portion of your energy use. A block represents a set amount of renewable energy - specifically, 100 kilowatt-hours (kWh) of renewable energy. Each block costs \$1.95 a month. Charges for Blue Sky Block remain constant each month and do not fluctuate with your electricity usage.

Renewable Portfolio Standard requirements. Renewable Energy generated in responses to any federal or state statutory requirement to construct or contract for the Renewable Energy is not eligible. QUALIFYING INITIATIVES: 1. Funding for locally-owned commercial-scale Renewable Energy projects that produce less than 10 MW of electricity.

There are two general categories of natural resources--non-renewable and renewable. A non-renewable resource is not capable of being renewed, replaced or takes a very long time to replace. A renewable resource is capable of being renewed or replaced. Non-renewable resource examples are coal, oil, natural gas and uranium.

The Energy Gateway network, led by Portland, Ore.-based PacifiCorp, a power supplier for parts of six Western states, was proposed in 2007. Its initial purpose was to deliver ...
