

Photovoltaic toilets

photovoltaic (PV) system--a way to generate electricity by using energy from the sun. These systems have several advantages ... pump water for toilets and showers, look for the most water-conserving fixtures. 3 In the United States, PV systems must have unobstructed southern exposure. Sun's Path in the Sky

1. Bio-digester Toilets. Photo Source. Bio-digester toilets are designed to convert human waste into gases and manure. The zero-waste biodigester technology uses psychrotrophic bacteria like Clostridium and Methanosaerica (these microbes can live in cold or hot climate and feed on waste to survive) to break down human excreta into usable water and gas.

The program was created to design toilets that capture and process human waste without piped water, sewer or electrical connections, and transform waste into useful resources, such as ...

Toilet System in Public Facilities Advanced Composting Systems, LLC 195 Meadows Road o Whitefish, Montana 59937 Phone: 406-862-3854 o Fax: 406-862-3855 Email: phoenix@compostingtoilet ... built-in photovoltaic systems for generating electricity, solar hot air collectors for keeping the

John Schaeffer is the president and founder of Real Goods - the foremost global source for tools and information on renewable energy, energy-efficient and sustainable living. He sold the very first photovoltaic (solar module) to the North American public in 1978 and over the years, through Real Goods, he has provided over 100 MW of solar power and has helped ...
