produced by PowerBox Systems, the new gyro is simple to install and simple to program, and the model is much easier to fly when the iGyro(TM) 3e is employed. To make a long story short, I can confirm these claims. The new gyro from PowerBox Systems is a genuine plug-and-play device: once you have checked the direction

Telemetry for every aspect of battery and receiver data is available for all supported systems. If a GPS III is connected to the unit, GPS data are also available - in so far as your radio control system supports this. ¹ The P² servo bus system works with all radio control systems - as was the case with the previous PowerBox Royal SRS.

PowerBox Systems GmbH - We develop and produce modern, innovative and reliable power supply systems for the modeller My account (login) ... The PowerExpander SRS makes it possible to exploit all the channels provided by ...

PowerBox CORE - the new generation of pro-class radios. Lead times vary on color, contact us for more information! PowerBox-Systems manufactures high-quality power supply equipment, and has now been working for more than a year on its own independent radio control system. On the face of it we may seem a little tardy in introducing a new 2.4 GHz RC system, but upon closer ...
