**Solar Panel Leasing Terms** . The typical solar lease lasts around 20 years, but terms may vary between solar panel installation companies. Some companies offer leases for up to 25 years, which aligns with the average home solar panel life span. Your lease agreement will include panel maintenance and servicing terms for the length of your contract.

What problems accompany selling a house with solar panels? If you own your solar panels outright, there should be no additional issues. If you're leasing your panels, you'll most likely have the option to buy out the lease (thus taking ownership of the panels) or to pass on the lease for the new owner to take up.

Even better: Sellers can have solar panels inspected in advance, fix any problems before putting the home on the market, and then present potential buyers with the report, Tanner said.

I used to be a sales man I use to sell them free solar panels. They are owned by one of 3 companies the biggest one called A Shade Greener they own the panels they are leased to the house for FREE. The contract says the panels can not be removed for 25 years. Well can be taken off twice for roof repairs etc then put back on.

The question of whether it's harder to sell a house with solar panels largely depends on the market, the solar panel system's financing, and how the sale is approached. In markets where energy efficiency and sustainable living are highly valued, solar-powered homes can actually be easier to sell and may command a higher price.

Buyers need to understand the status of solar panels when purchasing a home. It may affect their offer or their ability to get a mortgage. In the case of leased solar panels, it likely requires a transfer of the lease. Not being clear about leased solar panels could cost you a contract -- and lead to a lawsuit. **Leased Solar Panels and MLS Listings**

Ultimately, the decision to sell a house with solar panels will depend on your individual circumstances and
