San Ramon has been our home town since 2005! Whether you want to power your home, charge your electric vehicle, or heat your pool, using free energy from the sun can help you dramatically reduce your monthly utility bill. This is especially true in San Ramon, California - a region whose Mediterranean climate and abundant sunshine make it ideally suited for harnessing solar energy.

Net metering is another solar incentive available in Utah, although not mandated statewide and thus offered only by certain power companies. With net metering, you receive credits for the excess energy your solar system generates that you don't immediately use, which is sent back to the electrical grid.

The inverter is usually the only part that needs to be changed after 10-15 years because it continuously works to convert solar energy into electricity and heat (solar PV vs. solar thermal). Apart from the inverter, the cables also need maintenance to ensure your local solar installation company-provided system runs at maximum efficiency.

Yesterday, D. E. Shaw Renewable Investments (DESRI) announced that Elektron Solar, an 80 MWac solar facility located in Tooele County, UT, had reached commercial operation.
