The average cost for a 400W electric storage heater is about EUR1 per day based on the average, standard rate of electricity in Ireland. For more powerful models, this cost can rise to EUR2 to EUR3 per day. Storage heaters work by using cheaper nighttime electricity, unit rates, to heat small bricks inside the heater.

Traditional electric heating uses storage heaters. These store heat inside their core, which is made from a dense heat-retaining material. Usually they heat up overnight, when they can make use of cheaper energy through an off-peak electricity tariff, and gradually release the heat over the following day.
