

Solar company fraud

Fraud By Solar Power Companies. Sometimes companies simply lie, and the solar industry is no exception. They make promises they don't keep. They tell you the system will work a certain way, but it doesn't. Their ads say things you find out aren't true. We've even seen situations where companies are accused of simply making up the power ...

As solar energy becomes more popular and affordable, homeowners across the country are becoming more interested in harnessing the power of the sun. While solar panels can offer significant benefits, including reduced energy costs and a smaller carbon footprint, the growing industry has unfortunately attracted its share of scammers and unethical companies.

However, the solar industry is not immune to fraud and scams. Unfortunately, in recent years, ... These salespeople may knock on your door, claiming to represent a solar company and offering you a deal on solar panels ...

These scams start with an unexpected phone call, message on social, or even an in-person visit. The so-called official offers you an "energy audit" to reduce your utility costs. Or they might try to sign you up for a "free" program to make your ...

The selection put DC Solar in the company of far better-known partners, including Amazon Web Services, Alphabet's Sidewalk Labs, and Microsoft co-founder Paul Allen's Vulcan Inc., all of which ...

Did a salesperson knock on your door and promise free rooftop solar panels at no cost to you? Or say you'll never have to pay another electricity bill because government programs, grants, or rebates cover your solar installation? It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest ...

The only problem is that some solar companies use the wrong estimates for annual electricity price increases. Solar quotes almost always come with projected savings over 25 to 30 years. If a solar installer estimates an annual increase of more than 3% per year, they better have some very good data to back that up.

Legitimate companies will usually share the benefits of going solar (of which there are many!) without promising specific, guaranteed amounts. However, rebates and referral bonuses are common and legitimate ways solar installers ...

Costs and savings misrepresentations, in particular, have typically spurred the ire of state AGs when solar companies exaggerate their systems' potential to save consumers money, despite financing that may end up costing the consumer more. While cyberthreats to the power sector are expanding, so are the tools to address them.

Solar company fraud

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams: Do some research.
