Embrace technological advancements to stay ahead in the solar industry. Remember, not long ago, harnessing solar energy was costly and inefficient. However, from 2000 to 2019, we saw a more than 300-fold increase in solar power collection due to better technology and falling costs.

Another challenge to reshoring solar manufacturing is the uncertainty about whether the US will keep heavily subsidizing the clean energy industry, especially if the White House changes hands after the election this year. "The key is stability," Qu says, "Sometimes politicians are swayed by special-interest groups."

Of course, this new technology can be extremely expensive, especially considering that a lot of our solar batteries and technology are coming from China right now. China enforced a new policy which cancelled subsidies for power battery companies, but battery companies are still looking to expand in 2019. This means that, in addition to the ...
