

# Solar energy charities

Thanks to the new direct pay provision available through the Inflation Reduction Act, nonprofits receive 30% or more in cash back on the cost of a solar system, making a compelling case to go solar. How can we ensure that communities nationwide know about and can take advantage of this opportunity?

In our 6-year history, we have completed solar energy systems that power food production, clean water through desalination, electricity in schools, businesses and emergency services, as well as animal and land conservation efforts.

**The Basics of the Federal Solar Tax Credit.** The Solar Investment Tax Credit (ITC) is a federal incentive that allows a significant deduction on the installation costs of solar energy systems. In 2024, this credit stands at 30% of the total cost of solar installation, covering a range of expenses from equipment to labor.

The U.S. Department of Energy (DOE) launched the \$50 million Renew America's Nonprofits Program - referred to in President Biden's Bipartisan Infrastructure Law as the Energy Efficiency Materials Pilot Program - to reduce carbon emissions, improve health and safety, and lower utilities costs at buildings owned and operated by 501(c)(3) nonprofits.

Energy freedom starts with solar. We help people go solar and fight for their energy rights. Learn how you can benefit from solar at your home. Learn how you can go solar to control your energy costs.

Everybody Solar works to protect the environment and strengthen U.S. communities through solar energy projects. By providing solar power to local charities we help them reduce electricity costs and direct their limited resources to the communities they serve.

**Key Facts.** The world currently has a cumulative solar energy capacity of 850.2 GW (gigawatts).; 4.4% of our global energy comes from solar power.; China generates more solar energy than any other country, with a current capacity of 308.5 GW.; The US relies on solar for 3.9% of its energy, although this share is increasing rapidly every year.; 3.2 million US homes ...

Solar power is emissions-free, and the increasing adoption of solar, along with other renewable energy technologies, decreases the overall emissions that large buildings generate over time. Despite the many benefits of solar energy, many nonprofits lack the funding to install a solar panel system.

The Renewable Energy Foundation is a registered charity promoting sustainable development for the benefit of the public by means of energy conservation and the use of renewable energy.
