Some states and territories may allow you to apply for a solar or battery rebate on top of an interest-free loan. These can complement one another and further reduce the cost of your system. You will still be able to collect small-scale technology certificates (STCs) under the Small-scale Renewable Energy Scheme (SRES).

Starting 1 November 2024, the NSW Government will launch the NSW solar battery rebate as part of the Peak Demand Reduction Scheme (PDRS). This program aims to help homes and businesses with rooftop solar systems maximize their energy efficiency and reduce electricity costs by installing battery storage and connecting to a Virtual Power Plant (VPP).

Solar energy rebates nsw

A rebate or subsidy will cover part or all of the upfront cost of buying solar or a battery. Rebate schemes operated by states, territories and local governments sometimes only apply to particular groups of people or types of housing, such as social housing, rental properties or apartments. Eligibility criteria may relate to:

The Federal Government's Small-scale Renewable Energy Scheme provides subsidies for households that install or upgrade to eligible solar systems using an accredited installer. Most home solar systems are entitled to this subsidy, which is based around tradable certificates called small-scale technology certificates (STCs).

Empowering Homes Solar Rebate. The Empowering Homes Solar Rebate aims to help homeowners in eligible postcodes transition to renewable energy by providing interest-free loans for the initial cost of the panels. **What's On Offer?** For households in the eligible postcodes given by the NSW government, there are two main options to choose from:

Low-income Households Solar Rebate NSW. The next government solar rebate in NSW is called the Solar for Low-income Households trial scheme. This is a solar panel rebate in NSW and provides eligible households with a free solar PV system of up to 3kWh that could end up saving households up to \$600 per year, as stated by the NSW government.

Households and small businesses that install a small-scale renewable energy system (solar, wind or hydro), or hot water system, may be able to receive a benefit towards the purchase cost. Installing an eligible system allows the creation of small-scale technology certificates (STCs) with a value that can be redeemed by selling or assigning them.
