Oncor's Photovoltaic Standard Offer Program offers financial incentives for the installation of solar energy generating equipment and is open to all eligible residential and ...

Some retail electric providers offer buy-back plans for surplus generation sent to the grid. Customers should compare plans carefully to maximize their savings on electric usage. Oncor has a solar photovoltaic program that helps customers find service providers, and offers incentives that may offset initial costs.

Incentives are limited to 20% of the program budget (incentive cap) for each Service Provider (in combination with its affiliates). Oncor may raise the incentive cap based on program performance. \*Oncor reserves the right to increase or decrease the actual incentive budget of the program during the program year as needed to achieve Energy ...

Oncor offers incentives for both residential and commercial customers in their service territory through the Oncor Solar PV Standard Offer Program. In deregulated areas (Oncor service territory), customers can choose a retail electric provider that buys back excess power produced during the billing period, known as Renewable Energy Buy-Back Programs.
