I don't think solar is for you but seriously - we've had 5.5 kW of panels installed in 2013 (in WA). The only issue we had was with the inverter, which was promptly replaced under warranty. The system paid for itself in just over six years so we are already ahead.

Solar Citizens is an independent, community-based organisation that represents the millions of Australian households who are powering their lives with the sun, and the vast majority of Australians who support the transition to renewable ...

What is the average cost of solar in Australia? For those looking for the cost of solar power in Australia, Solar Choice publishes a solar price index each month with the current pricing state by state, for different system sizes. The pricing the below table includes the upfront STC rebate provided by the federal government but excludes any additional state incentives ...

Greetings from down under. I live in a home near the small town of Bellingen, in northern NSW, Australia. Glorious country: That's our home at left centre, and obscured by the tree and slightly off the left of the image is a secondary dwelling where my Mum lives. 12 acres, behind our home (to the left) is bushland.

All questions relating to Photovoltaic & Solar Panels in this forum, including feed-in tariffs, inverters, panels, calculations, schematics, installation, maintenance & fault finding. Solar panels forum. Solar forum. Solar talk. A photovoltaic system, also solar PV power system, or PV system, is a power system designed to supply usable solar power by means of photovoltaic.

Tindo Solar make the very best efficiency solar panels here in Australia. LG may be rated just slightly higher. I have installed these panels on my roof. Why would you not recommend a Australian made product that has a full replacement guarantee of 25 years. They are reasonably and competitively priced. Support Australia. No I don't work for Tindo. I am a ...

Broken Hill Solar Plant, New South Wales, 2016 Solar car park installed in a commercial shopping centre, 2020 Mount Majura Solar Farm, 2017. Solar power is a major contributor to electricity supply in Australia. As of December 2023, Australia's over 3.69 million solar PV installations had a combined capacity of 34.2 GW photovoltaic (PV) solar power. [1] In 2019, 59 solar PV projects ...

With just the solar panels on the roof, our annual electricity bill is now just \$900 a year. Half of that is spent just in the three months of winter (where a battery would be nearly useless). So spending \$5000 to save ~\$500 a year means around a ten year payback period (probably need to replace the battery soon after that anyway).

What's used to be an expensive and out of reach investment for most Australian households is now an affordable and accessible avenue, thanks to the huge government solar incentives that sees a steep reduction in the costs of panels and inverters nowadays. We're talking about 50% lesser than what it used to be in 2012, with \$0 upfront cost even made possible in certain cases.
