

## Solar powered sound system

This solar-powered sound system by CYBORIS Store is designed to be used outdoors. CYBORIS is portable and has dual power that can resist splashes and drops. All you need to use is a smartphone, or similar, with an open Bluetooth connection. With this sound system, you can listen to whatever you want to enjoy, without worry.

By using loud amplifier with IC TDA7240A and 12V input voltage, the amplifier is operated and produced loud audio output for outdoor purpose. It produces a small battery powered speakers and solar panel that can produce enough power to charge the battery by using solar charge controller to control and protect the battery.

Plus, every ten minutes that the solar panel charges in the sunlight equals out to a half-hour of music play time. The speaker itself weighs 1.06 pounds and has a compact, rectangular design, which is great for taking it on the go. It's also ready to face the elements: this speaker is waterproof, shockproof, and dust-proof.

Since the very nature of being solar-powered means that these speakers will be taken outdoors, you'll want to opt for a speaker that is equipped to handle the terrain. If you're a beach dweller, going waterproof is a must.
