While most modern aquaria come with LED lights, you can still find old fixtures in thrift stores and online for just a few bucks. Then it's just a matter of matching the length of the fixture to a black light tube. Quite a few stones are reactive to long-wave UV light, so you can also display others in the same area.

It's important to store light green crystals in a dry, safe place. Keep them away from direct sunlight or any other source of strong light, as it can fade the color of the crystals. You should also keep them away from moisture, as it can dull their shine. The best way to store light green crystals is in a clean, lined box or pouch.
