Solar shingles are generally lightweight and easy to install by a trained roofing company or solar installer. They are fast becoming a common feature in many American homes because of their higher curb appeal, flexibility and the impact ...

Another factor to consider is what material you want your sunroom's roof to be made of. Most sunrooms have

roofs made of glass, shingles, or aluminum. Glass roofs - Glass roofs are a popular choice for sunrooms because they allow natural light to flood the space.

What's the difference between a sunroof and a moonroof? A moonroof is not fairly different from a sunroof for home improvement. Moonroofs have become increasingly popular for homeowners looking to create a unique and atmospheric environment. I personally installed a moonroof in my home's living room, where the soft glow of moonlight adds a ...

Insulation for containers, transportation vehicles, refrigerated containers, reefer trucks, trailers/motor homes and railroad cars; Water-tight barrier and sound dampening capability; Used as a system over metal, concrete, modified bitumen, rubber, masonry and wood to stop heat gain, moisture penetration and corrosion development

Highlights. Resilient, transparent acrylic clear as glass side panels, immune to UV rays, retain 90% light transmission and clarity; Virtually unbreakable, twin-wall polycarbonate roof panels, filter the sunlight and block up to 100% of the harmful UV rays

Our sunroom roofs feature a layer of high-density structural thermal foam made from expanded polystyrene, which ensures maximum thermal protection and energy efficiency. Our sunroom roofs offer features such as: Our state-of-the-art thermal roofs are just one of the many components that help separate TEMO sunrooms from the competition.

To increase the natural ventilation in your attic, get a solar-powered fan designed to push more air through the vent. Adhere the small solar cell to the edge of your roof or the side of your home and run the wire up to a vent in the middle of your attic. Then, orient the fan towards the vent to keep hot air pumping out of your home.

To provide the clients with protection from the sun and seasonal elements, we implemented a lean-to roof system for shade and shelter. The ceiling fans allow for a much-welcomed steady breeze during the warmer months, and the fixed skylights to allow for the natural sunlight to flood back into the house during the day.

There are a few factors to consider when choosing your sunroom"s roof. The first factor is what style of roof will work with your home and preferences. Two of the most popular sunroom roof styles include: Gable roofs -- This is a traditional-style roof that looks similar to an A-frame roof. These are also called cathedral or vaulted sunroom roofs.

Project Sunroof's biggest claim to fame is its solar calculator tool, which uses multiple data sources to determine how much a home would benefit from a rooftop solar installation. The imagery provided by Google Earth creates a digital surface model, which shows the direction the roof faces (south or southwest exposure is best), the angle of ...

Other popular sunroom roof styles include conservatory roofs and curved-eave roofs (also known as solarium roofs). Another factor to consider is what material you want your sunroom's roof to be made of. Most sunrooms have roofs made of glass, shingles, or aluminum.
