

Sunpower energy storage

Peace of mind comes standard with the only home solar and battery storage solution designed by one company. SunPower Equinox® solar systems paired with SunVault(TM) Storage give you the chance to become energy independent and take control of the energy your home uses so you are prepared for power outages, blackouts, and more.

SunPower offers the only solar + storage solution designed and warranted by one company that gives customers control over electricity consumption and resiliency during power outages while providing cost savings to homeowners. For more information, visit .

System Overview. Powered by lithium iron phosphate battery packs and an advanced battery inverter, SunVault ® storage integrates with your SunPower Equinox ® system to provide energy, monitoring and intelligence to optimally ...

SunPower's solar battery system without backup captures and stores any excess solar energy your panels may produce during the day and saves it for use when utility rates are typically most expensive, helping you save money on your electric bill.

Designed by SunPower and backed by an industry-leading complete-system warranty. Generates more power in less space with fewer visible parts for a minimalist design. Eliminates unnecessary hardware and utility boxes on exterior walls. Easily add energy storage to provide backup power during an outage and to help reduce peak-time charges.

The battery storage system should not be relied upon as a single source of power for critical medical devices. Charge with Solar. As your SunPower Equinox ® system generates energy during the day, any energy you're not using is sent to your solar battery system for later use. Depending on the storage system you choose, this stored electricity ...

SAN JOSE, Calif., March 28, 2022 / PRNewswire / -- SunPower (NASDAQ: SPWR), a leading residential solar technology and energy services provider, announced that its battery storage system, SunVault(TM) Storage, now provides whole-home backup, meaning customers no longer have to sacrifice essentials or comfort during an outage.

SunPower is well-known for its top-notch solar panels that help you save money on your utility bills and reduce fossil fuels to help the environment. The SunPower SunVault battery storage system adds another layer of savings as well as backup power outage protection when you need it most.

A single SunVault unit has an energy storage capacity of up to 13 kWh or 19.5 kWh. If you need more storage, an additional double SunVault unit can be installed for up to 26 kWh or 39 kWh of...

Sunpower energy storage

Solar Battery Storage. Bigger savings, more control. Whether you want to maximize your solar savings or keep the lights shining bright during an outage, * The ability to provide electricity during an outage will vary based on the amount of energy stored in the battery, wattage and duration of use of devices/appliances connected to the system, the battery's ability to recharge during ...

This gives SunPower customers a choice when it comes to which home battery product will best meet their energy storage needs. How Home Solar Batteries Work.
