

The first dark horse in energy storage

Energy is a measure of a feed's potential to fuel body functions and exercise. Various pathways and substrates are used by the horse to produce a chemical intermediate that fuels muscle contraction during exercise and depends on the intensity and duration of the exercise. The basic driving force behind the various types of equine performance is the ...

Iron Horse, the first energy storage project for E.ON North America, is a customized 10 megawatt (MW), lithium-ion battery energy storage facility with an adjacent 2 MW solar array.

Notably, Alberta's storage energy capacity increases by 474 GWh (+157%) and accounts for the vast majority of the WECC's 491 GWh increase in storage energy capacity (from 1.94 to 2.43 TWh).

Dark Energy manufactures rugged power products for outdoor, military, and tactical use. Based in the heart of the Rocky Mountains in Salt Lake City, Utah, USA. Dark Energy is famous for the Poseidon Pro, a waterproof, rugged portable battery used by professional outdoorsmen and military forces around the world.
