Longest warranty: 40-year product and power warranty ensures unmatched long-term peace of mind. Top performer ...

Solar power has a small but growing role in electricity production in the United Kingdom.. There were few installations until 2010, when the UK government mandated subsidies in the form of a feed-in tariff (FIT), paid for by all electricity consumers. In the following years the cost of photovoltaic (PV) panels fell, [1] and the FIT rates for new installations were reduced in stages ...

Sunswap, a leading innovator in sustainable transport solutions, is sourcing UKSOL 370w flexible solar modules to enable energy efficiency of refrigerated transport. The partnership will see Sunswap utilising UKSOL's 370-watt flexible solar panels to power refrigeration units on articulated lorries across the UK.

In general, if you live in England, Scotland or Wales you won't need to apply for planning permission to install solar panels, unless you live in a conservation area or a national park or the solar panels protrude more than 200mm from your roof. If in doubt, it's best to check with your local planning office for clarity and guidance.

Solar Energy UK is targeting 70GW of solar by 2035. That's eleven years to triple current capacity and help lead the transition to a clean and resilient energy system for the UK. Later this year, we'll publish a strategic roadmap on how to make this happen. In the meantime, you can learn more about our progress in our latest
