Mixing solar and farming could be key to clean energy future. Typically US Solar plants its solar farms with a mix of native wildflowers and prairie grasses that attract pollinators, such as bees and butterflies. But increasingly, the company is looking for ...

When temperatures rise, utility costs do, too. While reputable companies can help you save money with clean or solar energy improvements, scammers offer more than they can deliver. The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home ...

I signed up for US Solar about a year ago and it has been a wonderful experience. I typically save about \$30-\$60 per month on my electric bills, and currently, Xcel Energy owes me over \$200 in credits for the power that my portion of the solar garden has added to the grid. This is honestly kind of a no-brainer.
