This year, Xcel Energy has launched a request for proposals for solar and battery storage projects to replace retiring coal plants. PNM is replacing an 847 MW coal plant with 650 MW solar power paired with 300 MW/1,200 MWh of energy storage. Vistra and NRG are replacing coal plants in Illinois with solar generation and storage solutions.

Void Storage is a feature that allows towns to trade hoppers out in favor of an automatic sorting system. This system relies on item frames to direct where items are sorted. This system can only be used inside a town and can be opened by players not in the town. To use Void Storage, you first need to craft a few items. Reinforced hoppers - special hoppers used only in Void Storage ...
